

## What is Montessori\*?

Montessori is a system of education based on order. It is conducted in a gentle, encouraging environment that instills a love of learning and self-confidence in children.

- The emphases of the curriculum are to empower children of all learning styles.
- Learning occurs first by demonstration and then by practice. Children may learn at their own pace.
- Mixed-age groupings in class allow younger children to learn from the activities of the older children, and provide the older children an opportunity to teach and nurture the younger children.

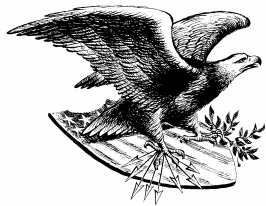

**The primary goal of a Montessori program is to help each child reach potential in:**

- **Self-motivation**
- **Respect for adults and other children**
- **Independence**
- **Problem-solving skills / academic skills**
- **A love of learning**

\*It is based on the work of **Maria Montessori**, (1870-1952), the first woman in Italy to qualify as a physician; her system focuses on the child's developmental needs for freedom within limits, as well as a carefully prepared environment which guarantees exposure to materials and experiences.
